## Welcome to Taiwan

## Post-Conference Tour

We want our delegates to make the most of their time in beautiful Taipei, which is the capital of Taiwan and full of beautiful views, nice food, and cultural merits. Let's extend our conference experience with an excursion in northern Taiwan! Please see the website for details.

### Endorsed by

- American Vacuum Society
- Korean Vacuum Society
- Thin Film Society (TFS, Singapore)

### Organized by

- Taiwan Association for Coating and Thin Film Technology (TACT)
- National Taipei University of Technology
- Ming Chi University of Technology

# Welcome Message from President of TACT 2019

## Special issues will be published in "Thin Solid Films" and "Surface and Coatings Technology"

- Since TACT was established in December 1998, we are happy to celebrate the 20th birthday this year. This association has organized six international conferences so far, including Asia CVD 2005, TACT 2009, TACT 2011, TACT 2013, TACT 2015, and TACT 2017. TACT 2019 is the seventh one, which will be held from November 17 to 20, 2019 at National Taipei University of Technology in Taipei, Taiwan.
- TACT 2019 is an important biennial event for knowledge exchange and interactive platform for researchers and engineers from academia and industry. TACT 2019 will cover a wide spectrum of aspects related to thin film and coating technologies for sustainable energy, semiconductor, optoelectronic, flexible device, tribological, organic, biological, protective and functional coatings.
- It is expected that there will be more than 700 abstract submissions for invited and contributed oral as well as poster presentations from domestic and abroad.

The TACT 2019 features seven important symposia and one short course, namely:

- Coatings for sustainable energy
  - Nanostructured and nanocomposite coatings
  - Semiconductor, optoelectronic and flexible device films
  - Tribological and protective coatings
  - Organic and biological coatings
  - Metallic and high-entropy alloy coatings
  - Topical symposium: theory, simulation, and modeling; quantitative surface analysis
- SC. Short course
